

Roy Diaz

Miami, FL | roy.diaz@atlantisuniversity.edu | GitHub: RoyCreator

PROFESSIONAL SUMMARY

Information Technology student with hands-on experience in cybersecurity, cloud computing, networking, SQL, Python, virtualization, and PC building and optimization. Experienced with technical labs involving vulnerability assessment, network analysis, SIEM monitoring, incident response, and cloud infrastructure. Interested in IT support, cybersecurity, cloud, and systems roles.

EDUCATION

Atlantis University - Miami, FL

Bachelor of Science in Information Technology | Expected December 2027

TECHNICAL SKILLS

Python • T-SQL / SQL Server • Git & GitHub • Docker • Azure • AWS fundamentals • VirtualBox • Hyper-V concepts • Kali Linux • Wireshark • Nmap • Wazuh • OpenVAS / Greenbone • Network troubleshooting • PC building & optimization • Incident response

SELECTED TECHNICAL EXPERIENCE & PROJECTS

Cybersecurity & Penetration-Testing Labs

Completed authorized lab exercises using Kali Linux, Nmap, Wireshark, OpenVAS/Greenbone, Wazuh, ZAP, and related tools to identify services, analyze traffic, review vulnerabilities, and document defensive recommendations.

Cloud Infrastructure Projects

Built and documented cloud environments using Azure concepts including resource groups, virtual machines, networking, RBAC, monitoring, security controls, budgets, and disaster-recovery planning; also completed AWS pricing and migration research.

SQL Server & Data Projects

Worked with SQL Server 2022, AdventureWorks, query development, indexing, performance analysis, ACID concepts, database security, and business-data analysis.

Python Development

Created command-line programs using functions, object-oriented programming, recursion, CSV processing, error handling, data structures, and persistent application design.

PC Building & Optimization

Hands-on experience selecting PC components, assembling systems, configuring BIOS/UEFI settings, troubleshooting hardware and Windows stability issues, and optimizing systems for performance.

ADDITIONAL EXPERIENCE

Experience supporting a family-operated mobile food business, including day-to-day operations, event preparation, organization, and coordination. This experience strengthened reliability, communication, and practical problem-solving skills.
